AKHIL SAI GURUJU

Senior Technical Analyst | AI/GenAI Technical Support | Support Engineering & Automation

Hyderabad, India | +91 96297 78269 | gurujuakhilsai@gmail.com | linkedin.com/in/akhil-sai-guruju-9b7382102

PROFESSIONAL SUMMARY

Senior Technical Analyst with 9 years of experience across enterprise SaaS support, application troubleshooting, and production operations. Experienced in SQL-based data investigation, REST API debugging, log analysis, incident management, and root-cause analysis. Hands-on experience using Claude Code and the Model Context Protocol (MCP) to build and use AI-assisted triage workflows integrated with Gainsight APIs, REST endpoints, and log sources. Experienced in applying AI-assisted investigation workflows to real customer support tickets, reducing investigation time and streamlining diagnostic information gathering. Proficient in Python, shell scripting, technical problem-solving, and product defect analysis. Gainsight Administrator Level 3 certified.

TECHNICAL SKILLS

AI & Automation	Claude Code, Claude/Anthropic, AI-Assisted Triage, AI Agents, Model Context Protocol (MCP), Prompt Engineering, Investigation Workflow Automation, Gemini, Nano Banana, Staircase AI, NotebookLM, Julius AI
Support Engineering	L2/L3 Technical Support, Enterprise SaaS Support, Production Support, Root-Cause Analysis (RCA), Incident Management, Troubleshooting, Log Analysis, Bug Triage, Performance Investigation, SLA Management, Escalation Management, Batch Jobs, Cron Jobs, AutoSys, SRE Fundamentals
APIs & Integrations	REST APIs, JSON, Postman, API Troubleshooting, Third-Party Integrations, Gainsight Integrations, Diagnostic Tool Integrations
Programming & Data	SQL, PL/SQL, Python, Pandas, NumPy, TensorFlow, Shell Scripting, Unix, VBA, Java, C, C++, BIQL, MySQL, Teradata, Alteryx, Trifacta
Gainsight Platform	Gainsight NXT, Administrator Level 3, Rules Engine, Journey Orchestrator, Customer 360 (C360), Cockpit, Health Scoring, Connectors, Data Investigation, Configuration Troubleshooting
Tools & Reporting	Git, Jira, Zendesk, SSIS, SSRS, Looker, Excel, SharePoint
Web Development & Design	HTML, CSS, JavaScript, React, GSAP, Anime.js, UI/UX Design, Responsive Web Design, Motion Design

PROFESSIONAL EXPERIENCE

Gainsight · Hyderabad, India — **Oct 2021 – Present**

Senior Technical Analyst — May 2026 – Present

- Resolve complex customer issues across Gainsight features, including Rules Engine, Journey Orchestrator, Customer 360, Cockpit, health scoring, and integrations.
- Use Claude Code–based AI triage workflows with MCP-connected tools to investigate real customer support tickets, bringing relevant tenant context, API data, logs, and configuration history into the troubleshooting process.
- Work with 7+ tool integrations across Gainsight APIs, REST endpoints, and log sources to gather diagnostic evidence, reduce manual information gathering, and shorten investigation time.
- Develop and refine prompts and investigation workflows to structure complex troubleshooting and help surface potential root causes from available technical evidence.
- Perform SQL-based data analysis, REST API troubleshooting, application log analysis, and root-cause investigation to diagnose data inconsistencies, rule execution issues, and integration problems.
- Collaborate with engineering teams by documenting reproducible issues and providing technical evidence to distinguish configuration problems from potential product defects.
- Maintain a customer-focused approach to issue resolution, technical communication, and support quality.

Technical Analyst — October 2021 – May 2026

- Served as a Level 2 technical point of contact for enterprise SaaS customers, investigating complex product issues and supporting timely resolution.
- Investigated data and application issues using SQL queries, backend analysis, REST APIs, and application logs.
- Diagnosed problems involving product configuration, rules execution, integrations, data processing, and reporting.

- Analysed API responses and technical evidence to identify probable causes and determine whether issues required configuration changes or engineering investigation.
- Documented findings, reproduced defects, and coordinated with internal teams to support effective troubleshooting and resolution.
- Created reusable troubleshooting guidance and prompt-engineering playbooks to improve consistency in technical investigations.

Bank of America · Hyderabad, India — Sep 2017 – Oct 2021

Senior Software Engineer — October 2020 – October 2021

- Provided L3 production support for claims-processing and credit-card fraud applications, managing incidents from initial triage through resolution.
- Investigated production failures involving batch processing, cron jobs, application services, and data transfers.
- Monitored and troubleshot scheduled jobs and workflows using AutoSys, including failed jobs and processing dependencies.
- Analysed application logs, service behaviour, memory-related issues, and API traffic to support incident diagnosis.
- Coordinated with relevant technical teams to restore application functionality and maintain operational stability.

Software Engineer — September 2017 – October 2020

- Supported enterprise applications through production monitoring, incident investigation, and issue resolution.
- Troubleshot batch-processing failures, scheduled jobs, and file-transfer issues involving NDM and AutoSys.
- Used SQL and backend investigation techniques to identify data-related issues and support application recovery.
- Automated repetitive operational tasks using Python, VBA, and shell scripting.
- Supported incident documentation, root-cause investigation, and operational process improvements.

PROJECTS

Claude-Powered AI Triage Agents · Gainsight Support Automation — Ongoing

- Developed and refined Claude Code–based AI triage workflows using the Model Context Protocol (MCP) to connect AI-assisted investigations with Gainsight APIs, REST endpoints, and log sources.
- Configured and used a combination of existing MCP tools, MCP server/tool configurations, and Claude Code MCP configuration to retrieve relevant diagnostic information for complex support investigations.
- Integrated 7+ tools to gather tenant context, error logs, and configuration history, reducing manual information gathering across investigation steps.
- Designed prompts and investigation workflows to consolidate diagnostic evidence and help identify potential root causes during real support-ticket investigations.
- Used the workflows regularly in support investigations, reducing investigation time while keeping troubleshooting grounded in retrieved technical evidence.

Noctua Consulting Website · Website Design & Development — August 2026 – October 2026

Website: https://www.noctuaconsulting.co.in/

- Designed and developed the website from scratch, covering page structure, UI/UX, responsive layouts, and visual presentation.
- Built an aesthetic, modern web experience with attention to layout consistency, typography, usability, and motion.
- Used AI-assisted workflows involving Claude Opus/Sonnet and Gemini/Nano Banana to support design exploration and development.
- Applied iterative design and development workflows to refine the website's visual quality and user experience.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Gainsight Administrator Level 3 Certification — 2023
Site Reliability Engineering (SRE) — In Progress
Data Analysis with Alteryx and Trifacta — 2018 – 2019
Project Management Course — 2016 – 2017

EDUCATION

Bachelor of Technology (B.Tech), Electronics and Communication Engineering — 2013 – 2017

Vellore Institute of Technology (VIT) · CGPA: 7.6/10
